PREVENTIVE SPRAYING BEGINS

Mosquito-Spraying scheduled at Dania Beach Frost park

DANIA BEACH – Three months of mosquito-spraying is scheduled at Frost Park to fight and protect residents and visitors from mosquito bites. This spraying is done as a proactive measure to combat a large number of mosquitos in the Frost Park area.

Private contractor Toro Pest Management will spray at Frost Park on September 19th, October 10th and 31st and November 21st to eliminate mosquito larvae in the premises.

Dania Beach is spraying specifically at Frost Park due its proximity to mangroves and wetlands right across the street from the facility.
